

Press Release: October 8th, 2013.

North-Line Canada Ltd. is pleased to announce that it has been appointed the North American distributor for Geolux d.o.o.

We are excited about this new partnership and feel that the Geolux products will contribute significantly to our customer requests for advanced technologies. The Geolux products confirm our mission and commitment to our customers; to be their national source for detection technologies by providing the most advanced and effective products that best satisfy their applications and system goals.

About Geolux

Founded in 2007, European-based Geolux develops, designs and manufactures electronic sensors and equipment for security, traffic and military applications. Product lines include radar speed sensors, radar intrusion detectors, visible and thermal surveillance cameras and GPS tracking equipment.

The Geolux line of radar sensors includes both CW and FMCW radar products operating in the 24GHz frequency range.

The radars are available for Multi-Lane Traffic detection as well as complex Security applications. Detection ranges vary from 800 meters for vehicles while pedestrians can be detected at distances of 400 meters.

Geolux radars are small and compact and can withstand temperatures ranging from -40°C to +85°C, which allows them to operate flawlessly in all climates and environments.

Geolux products have been installed and are operating flawlessly in Africa, Asia, Australia, Europe and North America. Geolux is constantly researching, developing and innovating, with the ultimate goal to become a global leader in personal and vehicle radar technology in the forthcoming years.
