

Houston Radar's products are designed to ensure operational safety while cutting down deployment time.

Analyze and generate industry standard reports with Houston Radar's Stats Analyzer™ application for Windows®.

1. Generate hourly counts, average speed and 85th percentile speed reports by month and day of the week
2. Generate speed vs. percentile chart
3. Compare traffic patterns over multiple weeks and months
4. Generate tally report per standard form 1882
5. Interactively zoom, scroll and re-bin speed and volume data

Built on a rock-solid foundation of our DC310 microwave sensor, Houston Radar's Armadillo® provides a turn-key solution to your traffic monitoring needs. We packed a world class feature set in a small, portable and easy to deploy form factor.

Ultra-low power consumption allows over 2 weeks of run time on batteries & unlimited run time with MPPT solar option.

- 📍 With Geo-tagging option, users can move Armadillo® from location to location before downloading all data sets and be confident that every data set will be properly associated with its location.
- 🔌 High speed AC charger comes standard and completely charges built-in battery in 3.5 hours.
- 📶 Built-in USB port allows fast data download and overnight charging from a standard AC or car adapter.
- 📶 Built-in ultra-long range Bluetooth comes in standard and allows you to safely download data from up to 300 m away.

World Wide Leader

Houston Radar is proud to service twenty-eight countries around the globe. For questions and more information contact us
