# VIDEO DETECTION SOLUTION

VEHICLE, CYCLIST, AND PEDESTRIAN

The North Line OWL is the instinctive choice for non-intrusive vehicle, cyclist, and pedestrian video detection. Its high-definition colour camera captures a wide angle and operates with a mobile app for unsurpassed precision. With optional LTE connections, solar panels, or additional batteries, the OWL is optimal for **turning movements** and dedicated path studies, whether temporary or for permanent placement. Call +1 905.985.2120 for the OWL today.
