

OTTER 778

CANADIAN DETECTION SOLUTION CANADIAN DETECTION SOLUTION

The OTTER 778 is the smart, Canadian solution for multi-user count and classification, including bicycles, pedestrians and scooters. With non-intrusive, built-in artificial intelligence (AI), the OTTER 778 provides ultra-reliable data to future-thinking transportation planning and professionals. The OTTER 778 is the complete solution from North Line Canada. Call us at +1 (905) 985-2120 to advance your data-driven decision-making today.

VISION ZERO

Measure long-term trends for informed decision-making.

ULTIMATE PRECISION

Built-in multimodal AI uses advanced algorithms to process data.

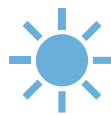

CUSTOM DETECTION

Two user-adjustable zones for the exact counts you need.

ACTIVE TRANSPORTATION

Detect people, bicycles, and horses—together or independently.

ENERGY EFFICIENT

NEMA-certified, low-power hardware for your longest studies.

CANADIAN CASES

User-tested waterproof, impact-resistant cases you can count on.

ACCESSIBILITY

Wi-Fi or Bluetooth for safe, remote user set up and data download.

BUDGET-FRIENDLY

One-person set up, and real-time support when you need it.

CANADIAN

Over 40 years.
All of them in Canada.
